leetcode.com/u/SOUNDARARAJAN_R

Summary

B.Tech student in Artificial Intelligence and Data Science, currently pursuing 3rd year (CGPA: 7.5), with a strong programming foundation in Python, Java, and C++ and working knowledge of SQL. Skilled in problem solving, data structures and algorithms, and object-oriented programming. Experienced in applying analytical thinking to build technical solutions through hackathon projects, with a growing interest in software and application engineering.

Education

SSLC (10th Grade), *Komarasamy Gounder Matric Hr. Sec. School* 2021 – 2022
Percentage: 91.2% Nambiyur

HSC (12th Grade), *Komarasamy Gounder Matric Hr. Sec. School* 2023 – 2024
Percentage: 93.4% Nambiyur

B.Tech in Artificial Intelligence and Data Science, 2024 – 2028
BannariAmman Institute of Technology Sathyamangalam
CGPA: 7.48 Expected Graduation: May 2028

Skills

Programming Languages
Python, Java, C, C++ (Basic)

Web Technologies
HTML, CSS, Javascript, React

UI/UX
Basic understanding of user-friendly interface design

Database
MySql,MangoDB

Core Concepts
Problem Solving, Data Structures & Algorithms, Object-Oriented Programming, DBMS, Artificial Intelligence, Data Science Fundamentals, Prompt Engineering.

Tools & Platforms
GitHub, LeetCode,Codeforces

Projects

AI-Based Smart Learning Platform for Identifying competency gap,Personal Training

- Developed an AI-powered web platform to identify students' competency gaps through skill assessments.
- Implemented XGBoost and Random Forest machine learning models for skill prediction and personalized recommendations.
- Built an interactive dashboard to visualize competency scores, learning progress, and performance analytics.
- Tech Stack: Python, XGBoost, Random Forest, Scikit-learn, Flask, HTML, CSS, JavaScript.

Livestock & Dairy Production Analytics System
Tech Stack: Python, Streamlit, Pandas, NumPy, Plotly, XGBoost, Scikit-learn, GitHub

- Built an AI-powered dashboard to analyze dairy livestock data and predict daily milk yield using XGBoost.

- Processed and analyzed a 100,000-record dairy cattle dataset using Pandas and Scikit-learn.
- Developed interactive visualizations for breed, feed, health status, and milk production trends using Plotly.
- Implemented productivity alerts and feeding recommendations through a Streamlit web application.

Order Management System
Tech Stack: HTML, CSS, JavaScript, Python (FastAPI/Flask), SQLite, Git, GitHub
- Built a full-stack Order Management System for customer, staff, and admin roles.
- Implemented order lifecycle tracking (Placed → Processing → Completed/Cancelled).
- Developed backend APIs in Python with SQLite database integration.
- Created a responsive web interface for order creation, tracking, and history management.
- Managed customer details, ordered items, total amount, and order status in real time.

Core Strengths

- Communication
- Analytical Thinking
- Teamwork & collaboration
- Time management
- Adaptability

Accomplishments

Smart India Hackathon (SIH) 2025
Participant (College Level).

Certifications

- Agentic AI Agentforce Certification – Salesforce
- Introduction to Internet of things – NPTEL

Languages

- English
- Tamil
